FOR IMMEDIATE RELEASE

BMC GROUP INTRODUCES VIRTUAL DATA ROOM COMPLIANCE MANAGEMENT INTERFACE TO FACILITATE ELECTRONIC RECORDS MANAGEMENT FOR CORPORATE GOVERNANCE

NEW YORK, NY (April 3, 2008) –In response to the increasing regulatory obligations and demands for compliance management faced by corporations, BMC Group, Inc. today announced the release of its Compliance Management Interface. The interface allows data files to be fed directly from BMC Group's Virtual Data Room (VDR) platform to a client's communication compliance system. Originally developed to allow investment banks using BMC Group's VDR solution to comply with SEC Rule 17a-3 requiring retention of broker dealer records, the interface provides an ideal solution for all corporations using VDRs to meet record keeping obligations. It can be configured to meet client-defined requirements with respect to frequency as well as output format and destination.

"BMC Group is committed to exceeding the virtual data room market's requirements through innovative technology solutions," said BMC Group CEO Sean Allen. "We see an increasing need for services that provide more than just the basic mechanisms for secure data exchange. Our solutions address the regulatory environment and other factors influencing market requirements."

BMC Group's worldwide operations coverage allows deal owners to set up and kick-off a VDR in a matter of hours. What separates BMC Group from other competitors is incorporating a flexible, agile approach in delivering customized solutions using innovative methodology and process. To find out more about why users everywhere say BMC Group Virtual Data Room is the simplest, fastest and most secure data room in the industry, please contact our representatives at vdrsales@bmcgroup.com or call toll free 1-866-VDR-7788
